Next steps

1. Access Data

Use your client secret and client ID to access. Make sure to store your client secret securely, as it will not be shown again.

2. Scope

- Professional Headsets (EPOC, FLEX): All [data streams](#) (except EEG, High-Resolution PMs)
- Consumer Headsets (MN8, Insights): All [data streams](#) (including EEG, High-Resolution PMs)

3. Integrate Authentication

Implement the required authentication method in your app to connect with our API seamlessly.

4. Test Your Setup

Send your first API request and verify the response to ensure your integration is working as expected.

5. API Documentation

Dive into our API documentation for details on available endpoints, request formats, and response handling to unlock the full potential of your app.

☐ I have saved my Client Secret and stored it safely.
